PROFESSIONAL SUMMARY

Computer Science fresher with hands-on full-stack expertise in Java, Spring Boot, and React.js. Delivered two production-grade applications featuring JWT/RBAC security, REST APIs, and MySQL. Strong foundation in Data Structures & Algorithms. Seeking a Software Developer role to build scalable, real-world solutions.

TECHNICAL SKILLS

Languages: Java, SQL, HTML5, CSS3

Frontend: React.js, Bootstrap, Responsive Design

Backend: Spring Boot, Node.js, REST API Development

Database: MySQL, SQL Server

Tools & Concepts: Git, GitHub, IntelliJ IDEA, VS Code, OOP, Agile/SDLC, Data Structures & Algorithms

WORK EXPERIENCE

Java Full Stack Developer Intern — Infosys Springboard

Oct 2025 – Dec 2025

- Engineered MedVault — a production-grade healthcare platform using Java, Spring Boot, React.js, and MySQL following MVC architecture, delivering end-to-end appointment and records management.
- Secured all API endpoints with JWT-based authentication and Role-Based Access Control (RBAC) across Patient, Doctor, and Admin roles, eliminating unauthorized access.
- Reduced scheduling conflicts by implementing real-time slot management with concurrency handling, OTP-secured UPI payment flow, and access-controlled medical records.

PROJECTS

MedVault — Appointment Booking & Medical Records System github.com/Imahez/MedVault Java · Spring Boot · React.js · MySQL · JWT · RBAC

- Architected a scalable multi-role healthcare platform supporting 3 user roles (Patient, Doctor, Admin) with appointment scheduling, payment processing, and medical records access control.
- Engineered real-time slot conflict detection and OTP-secured UPI payment integration, streamlining consultation booking with zero double-booking incidents.
- Delivered clean separation of concerns across React.js + TailwindCSS frontend, Spring Boot REST backend, and normalized MySQL schema — production-ready and fully documented.

EcoWaste — Smart E-Waste Collection & Management System github.com/Imahez/EcoWaste Java · Spring Boot · React.js · MySQL · Google Maps API

- Built a full-stack e-waste management platform connecting consumers with certified recyclers, supporting 3 roles (Admin, Pickup Personnel, Customer) with granular workflow controls.
- Integrated Google Maps API for location-based pickup scheduling with real-time geographic routing and distance calculation, reducing manual coordination effort.
- Automated end-to-end email notification system for real-time status updates across the pickup lifecycle, cutting manual follow-up by an estimated 60%.

EDUCATION

B.E. — Computer Science and Engineering

Cape Institute of Technology, Tirunelveli, Tamil Nadu

Jul 2022 – May 2026

CGPA: 7.20 / 10

CERTIFICATIONS

- Programming Using Java — NPTEL
- Data Structures and Algorithms Using Java — Infosys Springboard
- Database Management Systems — Infosys Springboard
